Avizo and Amira Workshops: Call for Expressions of Interest
Presented by the VSG team

When: To be announced (September/October time frame)
Where: iVEC@UWA and ARRC
(Exact locations still to be determined based upon demand)

iVEC@UWA in conjunction with the iVEC Visualisation and Education program invite expressions of interest for hands on training using the Avizo or Amira 3D visualisation and analysis software. The Visualisation Sciences Group (VSG) provided some introductory training to researchers across the iVEC partner institutions in April 2013 and this second round of proposed workshops are intended to build upon that earlier training. In particular this is an opportunity to arrange a session with one of the VSG team for one-on-one training targeting your particular research problem, ideally with a pre-arranged dataset of your own.

If you would like to take advantage of this opportunity please email Charise Baker (charise.baker@uwa.edu.au). Include information on the discipline (for example: Life Sciences, Materials, Engineering, Geoscience), any particular visualisation/analysis you would like covered, your partner institution and any dates for when you are unavailable.

VSG
http://www.vsg3d.com

VSG distribute software providing solutions targeting a range of visualisation and analysis problems. These include, but are not limited to, the materials and physical sciences, medical and life sciences, engineering, natural resources, rock physics and the geosciences in general. The Avizo software family is a key commercial visualisation solution supported by iVEC.
